# Raising $1M Pre-Seed to Unlock a $10B+ Market

## Overview
Penteraction is an AI-driven personal assistant that autonomously manages your digital life—emails, calendars, and instant actions—slashing friction and screen time. Built with proprietary IP, we're redefining productivity in a $10B+ consumer AI market.

## The Problem
Digital overload costs billions in lost productivity annually.

Existing AI tools (e.g., ChatGPT, Grok) lack human-like assistance and seamless integration into daily workflows.

## Our Solution
Penteraction: A near-complete MVP that autonomously handles your digital tasks with advanced frameworks (beyond LLMs).

Key Differentiator: Proprietary IP delivers unmatched human-like assistance, reducing screen time and boosting efficiency.

Demo: See it in action demo.penteraction.com

## Market Opportunity
Targeting a $10B+ productivity/consumer AI market, projected to grow exponentially.

Goal: 10,000 users by year-end 2025, capturing a significant share of the market.

## Traction
$2K revenue and 80 enthusiastic users in a 2-month trial run.

Strong interest from early adopters, with momentum building for our next phase.

## Team
Founder: Michael Goad, a serial entrepreneur with 10+ years in tech, deeply connected to the productivity problem, and a molecular-level understanding of the space.
Supported by a growing network of advisors in AI and consumer tech.

## The Ask
Raising $1M pre-seed to scale engineering, marketing, ops, and secure our proprietary IP as we grow globally.

Seeking partners to join us in redefining human-AI interaction.
